RE: Rock Crusher

Over the past 10 years we have paid to have a rock crusher brought on site to our concrete pile to crush the broken pile of concrete into a usable grade of crushed stone for subgrade base for road repairs, valley gutters, parking lots, gravel roads, and numerous other uses. We usually crush around 12,000 cubic yards per usage. Each time we bring in the crusher the cost ranges from \$45,000 to \$50,000. This stockpile will last 2-3 years depending on how many projects are performed and how much rain we receive (we use the crushed concrete to dry wet/soft spots after a rain). This is offered as a recycling for the citizens of Haysville to have a place to bring the unwanted concrete.

The Purple Wave Auction has advertised several used rock crushers. The portable units have sold for \$30,000 - \$84,000 in the past year.

This will be presented at council tonight under Public Works.

We would like to have authorization to bid on a portable rock crusher up to \$35,000 with 10% auction fee and \$7,500 shipping cost, for a total authorization of not to exceed \$46,000.
