

CARE OF WATER METERS

It's that time of year again where soon your grass will be growing, which means there will be mowing.

Please be extremely careful when mowing around your water meter. City Code states that customers are responsible for any accidental or willful damage to water meters, their connections, meter box, cover and any other associated equipment. In the event of accidental or willful damage, the customer shall promptly notify the water department which shall make the necessary repairs and charge the customer, and that charge shall be invoiced and payable with the succeeding monthly bill.

It also states, no trees, bushes, shrubs, fences, structures or other obstructions shall be located within two feet of the meter box in order to keep the meter box accessible and able to transmit readings.
